Origin : China - Shanghai

Age : circa 1950

Description

This small, tonic and original pink shellac desk will add a very personal touch, whatever its destination and use;

In a child's or teenager's bedroom, or in a tele-working corner, it will illuminate both style and functionality.

Compact and harmonious, it once belonged to a student who didn't compromise on storage. Its spacious drawers, embellished with attractive butterfly-shaped brass handles called "jili", allow for optimal organization.

The elegant lath at the bottom provides extra space for books, files and folders.
